NO EXCAVATION DRAIN REPAIRS

NO MORE DIGGING

FROM THIS

TO THIS WITH NO MESS

NQ Drain Doctor's Technicians have more than 13 years experience in this field now offer North Queenslanders a new and efficient form of "No Excavation" drainage repair that can be used to repair damaged drains without destroying the surrounding environment.

With this High technology drains can be repaired under busy roads without interrupting traffic flow or under your house slab, driveway or garden saving you the misfortune and inconvenience of having to dig up your valuable property.

No excavation drain repairs is a permanent solution which has a structural strength greater than that of the original pipe therefore stopping the drain from collapsing and eliminating further costs and excavation. The internal pipe repair will permanently seal the wall of the pipe leaving a very smooth bore and eliminating any further root invasion into the affected area.

No excavation drain repairs is rapidly becoming the preferred method of repairing drains and pipelines due to it's cost savings and minimal impact to the social and environmental surroundings.
